Primary Accountabilities Include:

Architect, design, program and develop database driven web-based applications and services
Identify, troubleshoot and resolve web application issues
Design and program user interfaces based on user requirements and customer feedback
Build new modules to enhance existing applications
Follow application development best practice workflows for testing and migration of applications into production
Gather functional business requirements for current and future business needs
Document technical specifications and test plans
Develop automated error reports and notifications in order to alert staff of issues before customers call for support
Maintain and enhance programming skills and knowledge to keep up with current website and application development trends
Develop secure web applications that meet OWASP standards and are capable of passing application penetration tests
IIS Management including URL rewriting, certificate management and request filtering
Architect, design, program and develop databases capable of supporting web applications
Generate customer facing report and graphic interfaces
Manage and monitor the performance of the application database
Collaborate and build relationships with relevant stakeholders in the organization
Collaborate with business and team members

Education/Experience Requirements:

Degree or diploma in computer science or related discipline
Minimum 5 years of experience with ColdFusion
Minimum 5 years of experience with MS SQL

Experience in Javascript, Python, HTML, CSS, jQuery, PHP, ASP.Net
Experience with API integrations including but not limited to Google Maps and Twillio

Skills and Attributes:

Excellent organizational and time management skills
Attention to detail, quick learner and produce quality documentation
Display a high degree of professionalism at all times (confidentiality, tact and diplomacy)
Strong communication skills both oral and written
Ability to build and maintain strong relationships

Additional Information:

This is a part-time term position and is expected to be approximately 6 months in length with the possibility of an extension. Hours will vary dependent on assigned priorities.

Application Process:

Candidates are invited to apply online at www.airdrie.ca.
