

Position Title: Senior Engineer - Northwest Langley WWTP Expansion Program

Position Status: Full-Time Regular

Department: Project Delivery

Employee Group: Exempt

Location: 4515 Central Boulevard, Burnaby

Salary Range/ Wage Rate: Professional / Technical, Level P4B (\$138,719.13 - \$163,194.52 annually)

Our Project Delivery Department is seeking a Senior Engineer who will act as the Interface Manager and lead the interface management among the program components for the Northwest Langley expansion program. The NLWWTP Expansion Program is a large capital program being undertaken by Metro Vancouver involving new and upgraded wastewater treatment facilities and outfall at NW Langley with related conveyance infrastructure including a new pump station and twin force mains and river crossings. This Senior Engineer position will coordinate and lead the interface management among these components and will be a part of the integrated program team. The Interface Manager will be working with program components to develop, implement and monitor effective program management and controls practices. In addition, this position will be involved with commercial and contract management, communication and engagement, permitting activities, and engagement with local First Nations and stakeholders, commissioning of all new facilities, including the upgraded WWTP, scheduled to be completed by 2031.

The Interface Manager will perform a range of engineering and management functions, including managing the interface management process, identifying and monitoring the status of the interface events, manage the interface risks. Reporting to the Project Director, the successful candidate will work with Project Managers, junior and senior team members, internal and external stakeholders to coordinate the planning, design, construction and, commissioning of multiple projects within the program to ensure the proper interconnection and functionality of the projects.

You are: a hands-on and collaborative individual who is well experienced with the complexities associated with design, construction and commissioning of WWTP and conveyance projects, project management and planning, interface management, project control, commercial and risk management. Possessing a collaborative style of leadership, and demonstrating a high level of professionalism with proven knowledge of resource allocation, construction management and technical disciplines/specialties, communication skills, the successful candidate will work effectively with senior leadership, junior team members, technical consultants, contractors, and a variety of internal and external stakeholders and partners. We are looking for an energetic team player and strategic thinker with a high level of initiative, motivation and drive, energy and enthusiasm for getting things done, who is able to work independently with minimal direct supervision, with a hands-on and collaborative management style.

The Senior Engineer reports to the Director, Major Projects.

As operationally appropriate and subject to change, this position is based at our head office and may participate in remote work up to one (1) day a week.

This role:

- Works as a technical/specialist resource and provides leadership for specialized and/or complex engineering, project management and technical work.
- Responsible for budget administration, preparation and reporting. Monitors and controls spending ensuring the effective and efficient expenditure of allocated funds. Contributes to the preparation of long range financial plans and provides input to strategic initiatives.
- Provides interpretation and guidance on technical issues, corporate policies, and project management. Ensures work is undertaken in conformance with corporate standards and policies and acts as technical resource to staff throughout the organization in area of specialty. Makes independent decisions and recommendations within broad policies and mandates. Uses judgment and ingenuity to devise practical and economical solutions to problems.
- Develops or provides input to technical standards, policies and procedures in accordance with corporate objectives. Considers all relevant information such as applicable design codes, specifications and previous experience.
- Makes decisions and/or recommendations on hiring engineering and technical consultants based on workload, costing, scheduling, expertise, and other factors. Oversees work carried out by multi-disciplinary consultants and contractors, including reviewing and providing direction on design, construction and claims. Ensures work is undertaken in conformance with corporate standards and policies, and meets the requirements of the project.
- Prepares and reviews a range of written materials including reports, recommendations, technical memoranda and technical specifications. May deliver presentations for various audiences including the public as required.
- May supervise or manage a small team of professional and/or technical staff engaged in complex technical applications. Monitors performance towards division, department and corporate objectives and ensures staff adhere to workplace conduct and purchasing policies.
- Works collaboratively with staff to resolve complex technical, design, operational, or relational issues staff encounter while doing their work. Facilitates information sharing among staff to transfer knowledge and experience and increase the efficiency and effectiveness of the team.
- Establishes effective working relationships with various outside agencies as well as other internal departments. Works collaboratively with departmental staff to deliver on strategic initiatives.
- May collaborate with senior engineers, management and/or government officials in the development of regulatory or government policy initiatives which affect Metro Vancouver.
- Upholds Metro Vancouver's reputation through positive and forthright dealings with other organizations and members of the public. Understands the organizational culture and the processes/mechanisms necessary to attain work objectives. May provide advice, recommendations and follow up to the Metro Vancouver board, committees and municipal councils.
- Performs other related duties as required.

To be successful, you have:

- Bachelor of Applied Science Degree in a relevant Engineering discipline. 8-10 years of recent related experience following professional registration; or an equivalent combination of training and experience.
- Membership or eligibility for immediate membership as a registered Professional Engineer (P.Eng.) with the Engineers and Geoscientists of British Columbia (EGBC).
- Extensive technical expertise and understanding of relevant engineering principles. Ability to interpret, apply and advise others on engineering and related guidelines such as technical manuals, codes and regulations, contracting policies, safety regulations and corporate and board policies. Ability to adapt or adjust guidelines and procedures for unique or problem situations.
- Superior written and oral communication skills including sound report writing and presentation skills. Ability to communicate complex information and implications to diverse audiences. Ability to explain difficult concepts and persuade others to adopt a point of view or way of doing things.
- Strong interpersonal skills and ability to build and maintain effective working relationships. Skill in dealing openly, tactfully and sensitively in a variety of situations. Ability to effectively lead project work and multidisciplinary teams. Deals effectively with disagreements and prevents the escalation of conflict.
- Proven ability to use judgment to resolve complex problems, take initiative and work with minimal supervision; seeks solutions in congruence with the organization's objectives and values. Ability to develop and revise procedures and plans to address problems and changing circumstances. Works cooperatively to resolve differences of opinion.
- Proven contract administration and project management skills and excellent attention to detail including troubleshooting and resolving complex contractual issues. Demonstrated ability to lead a complex series of project components and deliver projects on time and on budget.
- Ability to manage a complex portfolio of work while establishing ambitious and challenging goals; demonstrates persistence in overcoming obstacles. Responds to changing priorities due to internal or external pressures resulting in revised schedules and a reallocation of resources.
- Ability to supervise, coach and guide others while enhancing individual and team effectiveness. Ability to mentor and foster the development of direct reports.
- Proficiency using Microsoft Office programs including Word, Excel, Outlook and Project.
- Valid BC Class 5 Driver's License.
