

BUILD A CITY. BUILD A FUTURE.

HELP US BUILD A WORLD-CLASS CITY.

IT Application Analyst 3 (3 Year Term)

SCOPE

The City of Surrey has launched a three-year Action Plan to address the delivery of housing and support affordable housing projects that aims to increase new housing by 27.8% in our city. This action plan is supported by the \$95 million Housing Accelerator Fund (HAF) that was awarded to the City by the Canada Mortgage and Housing Corporation (CMHC). The Housing Accelerator Fund (HAF) will help improve the development approval process through an action plan designed to:

- Facilitate the delivery of housing in the short and long term;
- Enhance the certainty in the permit approval process;
- Increase access to affordable housing;
- Continue to support the development of complete communities that are sustainable and inclusive; and
- Further position Surrey as a destination for investment.

Help us deliver on Surrey's Action Plan. If you're looking for meaningful work that will directly impact the communities we live in, apply this job opportunity today.

Reporting to the IT Business Applications and Integrations Manager the **Application Analyst 3** will play a key role in the City's action plan to accelerate housing initiatives. These projects will be centered around online services for the Land Development department. This role is ideal for a senior enterprise application developer who excels in a collaborative, dynamic and fast-paced project environments. We are in search of a task oriented, self-starter who is confident, has exceptional communication skills and knows how to find balance with guidelines.

RESPONSIBILITIES

Under general direction, the successful candidate:

- designs, configures, and sustains enterprise applications and solutions.
- collaborates with stakeholders and IT management, studying data flow, recommending best tool sets, and work processes.
- is involved with all technical activities within the team – research, estimating, planning, code reviews, testing, deployments, and document creation.

- remains in touch with technology developments relevant to current and future initiatives.
- provides troubleshooting assistance and end-user support to our clients.
- communicates on open items and issues to key stakeholders, including management.
- works exceptionally well in a team setting supporting our collaborative work environment.
- makes recommendations to managers for operational improvements.
- is responsible for more complex and specialized assignments as well as leadership responsibilities.

QUALIFICATIONS & SKILLS

- Degree in a related field from a recognized institution plus four years related experience or an acceptable equivalent combination of education and experience.

Related experience includes:

- Proven hands-on experience with Municipal enterprise applications.
- Proven hands-on experience with development tools for Oracle and PL/SQL. (SQL Server, TSQL, and ANSI SQL experience are also relevant)
- Experience with data integration technologies (such as ETL, flat files, XML, SOAP, JSON, etc.) integrating custom or third-party software systems with an enterprise application.
- Experience with Waterfall and Agile Software Development Life cycle (SDLC) in an enterprise environment.
- Familiarity with source control and repository management tools (such as Git, GitHub, Azure DevOps)
- Familiarity with web development and related technologies and tools (such as HTML, JavaScript, CSS, etc.).
- Familiarity with web services integration using RESTful API and/or SOAP
- Demonstrated superior analytical, problem solving and judgement skills.
- Flexible and able to manage simultaneous priorities, pressures, and deadlines.
- Completion of a Police Information Check.
