

BUILD A CITY. BUILD A FUTURE.

HELP US BUILD A WORLD-CLASS CITY.

IT Application Analyst 3 (2 Year Term)

SCOPE

As one of the fastest growing cities in Canada, the City of Surrey is a globally recognized leader building vibrant, sustainable communities through technology and innovation. City of Surrey employees are talented innovators, inspired by meaningful work and the opportunity to drive our city—and their careers—forward.

Build a City. Build a Future at the City of Surrey.

Reporting to the IT Business Applications Manager the **Data Integration Application Analyst 3** will play a key role as part of the Data Integration Center of Excellence driving the City's migration from legacy integrations to a modern enterprise integration platform. This position is ideal for a senior technical expert who thrives in a collaborative, dynamic, and fast-paced project environment.

RESPONSIBILITIES

Under general direction, the successful candidate:

- designs, develops, configures, and sustains enterprise applications and integrations.
- collaborates with stakeholders and IT management, studying data flow, recommending best tool sets, and work processes.
- is involved with all technical activities within the team – research, estimating, planning, code reviews, testing, deployments, and document creation.
- remains in touch with technology developments relevant to current and future initiatives.
- provides troubleshooting assistance and end-user support to our clients.
- communicates on open items and issues to key stakeholders, including management.
- works exceptionally well in a team setting supporting our collaborative work environment.
- makes recommendations to managers for operational improvements.
- is responsible for more complex and specialized assignments as well as leadership responsibilities.

QUALIFICATIONS & SKILLS

- Degree in a related field from a recognized institution plus four years related experience or an acceptable equivalent combination of education and experience.

Related experience includes:

- Proven hands-on experience working with enterprise applications.
- Proven hands-on experience designing, building, and maintaining data integrations between enterprise applications.
- Experience working with data integration technologies such as ESB's, ETL, API's, iPaaS, or others.
 - Safe Software FME experience will be advantageous.
- Experience with Waterfall and Agile Software Development Life cycle (SDLC) in an enterprise environment.
- Familiarity with source control and repository management tools (such as Git, GitHub, Azure DevOps)
- Familiarity with development tools for Oracle and SQL Server.
- Demonstrated superior analytical, problem solving and judgement skills.
- Flexible and able to manage simultaneous priorities, pressures, and deadlines.
- Completion of a Police Information Check.

PAY GRADE	STANDARD STEP 1	6 MONTHS STEP 2	18 MONTHS STEP 3	30 MONTHS STEP 4
31	\$55.86	\$58.40	\$60.82	\$63.35

This job will be posted until filled.

INTEGRITY • SERVICE • TEAMWORK • INNOVATION • COMMUNITY

Help us build a world-class city. We are hiring talented innovators seeking meaningful work to drive our city - and their careers - forward.
