Position Title: Lead Senior Engineer

Position Status: Full-Time Regular

Department: Liquid Waste Services

Employee Group: Exempt

Location: 4515 Central Boulevard, Burnaby

Salary Range/ Wage Rate: Management / Leadership Level M3B (\$138,719.13 - \$163,194.52 annually)

Our Liquid Waste Services Department is seeking a Lead Senior Engineer who will lead and motivate a team of engineers, and manage a portfolio of vertical facility projects in protecting public health and our environment through the planning, design and construction of the regional liquid waste collections system..

You are: an inclusive leader who cares deeply about people, and will provide a supportive environment to your team. You draw on your technical strengths and experience designing and building large and complicated municipal infrastructure, specifically sewage pump stations in an urban setting. You will be able to take pride in your work, knowing that you made a difference.

The Lead Senior Engineer reports to the Division Manager, Engineering Design & Construction Collection Systems.

This role:

- Provides leadership to a team of professional engineers and technical staff responsible for complex and varied engineering portfolio, including design, construction and rehabilitation of pump stations, odour control units, and other vertical facilities.
- Supervises, mentors, and motivates staff, and guides team performance towards division, department and corporate objectives, including ensuring staff adhere to workplace conduct and corporate policies.
- Leads, coaches, and develops staff recognizing the importance of leadership, supervisory and technical training; develops and sustains a flexible workforce encouraging staff to pursue opportunities that complement their skills and experience.
- Accountable for budget administration, preparation and reporting. Monitors and controls spending ensuring the effective and efficient expenditure of allocated funds. Contributes to the preparation of long range financial plans and provides input to strategic initiatives.
- Establishes effective communication by liaising with senior management and other stakeholders, including working with Procurement to ensure the timely award of contracts. Disseminates project issues and potential

mitigations involving significant impacts on budget, schedule, quality or potential public impact and stakeholder concerns.

- Provides guidance on technical issues, corporate policies, and project management and ensures work is undertaken in conformance with corporate standards and policies. Makes independent decisions and recommendations within broad policies and mandates and uses judgment and ingenuity to devise practical and economical solutions.
- Develops or provides input to technical standards, policies and procedures in accordance with corporate objectives. Sets group standards considering all relevant information such as applicable design codes, specifications and previous experience.
- Makes decisions and/or recommendations on hiring engineering and technical consultants based on workload, costing, scheduling, expertise, and other factors. Oversees work carried out by multi-disciplinary consultants and contractors, including reviewing and providing direction on design, construction and contract administration. Ensures work is undertaken in conformance with corporate standards and policies, and meets the requirements of the project.
- Prepares and reviews a range of written material including reports, recommendations, technical memoranda and technical specifications. May deliver presentations for various audiences including the public as required.
- Works collaboratively with staff to resolve complex technical, design, operational, or interpersonal issues staff encounter while doing their work. Facilitates information sharing among staff to transfer knowledge and experience and increase the efficiency and effectiveness of the team.
- Establishes effective working relationships with various outside agencies as well as other internal departments. Works collaboratively with departmental staff to deliver on strategic initiatives.
- Upholds Metro Vancouver's reputation through positive and forthright dealings with other organizations and members of the public. Understands the organizational culture and the processes/mechanisms necessary to attain work objectives.
- May provide advice, recommendations and follow up to the Metro Vancouver Board, Committees and municipal councils.
- Performs other related duties as required.

To be successful, you have:

- Bachelor of Applied Science Degree in Civil, Mechanical, or Electrical Engineering. 8-10 years of recent related experience following professional registration; or an equivalent combination of training and experience.
- Membership or eligibility for immediate membership as a registered Professional Engineer (P.Eng.) with the Engineers and Geoscientists of British Columbia (EGBC).
- Extensive technical expertise and understanding of relevant engineering principles. Ability to interpret, apply and advise others on engineering and related guidelines such as technical manuals, codes and regulations, contracting policies, safety regulations and corporate and Board policies. Ability to adapt or adjust guidelines and procedures for unique or problem situations.
- Excellent written and oral communication skills including sound report writing and presentation skills. Ability to communicate complex information and implications to diverse audiences. Ability to explain difficult concepts and persuade others to adopt a point of view or way of doing things.
- Strong interpersonal skills and ability to build and maintain effective working relationships. Skill in dealing openly, tactfully and sensitively in a variety of situations. Ability to effectively lead a team and work collaboratively. Deals effectively with disagreements and prevents the escalation of conflict.

- Proven ability to use judgment to resolve complex problems; seeks solutions in congruence with the organization's objectives and values. Ability to develop and revise procedures and plans to address problems and changing circumstances. Seeks to include staff in decisions that will impact them; works cooperatively to resolve differences of opinion.
- Proven contract administration and project management skills and excellent attention to detail including troubleshooting and resolving complex contractual issues. Demonstrated ability to lead a complex series of project components and deliver projects on time and on budget.
- Ability to manage a complex portfolio of work while establishing ambitious and challenging goals; demonstrated ability to deliver on multiple projects simultaneously; demonstrates persistence in overcoming obstacles. Responds to changing priorities due to internal or external pressures resulting in revised schedules and a reallocation of resources.
- Ability to supervise, coach and guide others while enhancing individual and team effectiveness. Ability to mentor and foster the development of direct reports.
- Proficiency using Microsoft Office programs including Word, Excel, Outlook and Project.
- Valid BC Class 5 Driver's License.

Our Vision:
