City of Surrey employees are talented innovators, inspired by meaningful work and the opportunity to drive our city—and their careers—forward. **Build a City. Build a Future** at the City of Surrey.*

EMPLOYMENT STATUS

Union – CUPE Local 402 – Regular Full-Time

SCOPE

Are you passionate about leveraging and integrating technology to make a meaningful impact in a vibrant and growing community? This is your opportunity to join an award-winning organization as a Technical Lead, where you'll play a critical role in designing and implementing innovative IT solutions that support the City of Surrey's strategic goals.

As a key technical resource, you will bridge the gap between high-level architectural vision and practical implementation, collaborating with business analysts, project managers, and multidisciplinary teams to deliver sustainable solutions. Utilizing system design and problem-solving skills, infrastructure and application knowledge, along with critical thinking, leadership, writing, and collaboration experience, you'll ensure solutions are well-documented, operationally resilient, and effectively transitioned to operations for long-term sustainment.

RESPONSIBILITIES

As a Technical Lead, you will:

- **Design and Deliver Solutions:** Translate high-level designs and business requirements into detailed, actionable plans and low-level designs for implementation.
- **Collaborate Cross-Functionally:** Work with architects, business analysts, project managers, and operational teams to ensure alignment between technical solutions and business goals.
- **Lead Implementation Efforts:** Oversee infrastructure or application environment build, configuration, and integration, ensuring projects meet quality standards and timelines.
- **Provide Leadership:** Direct and guide technical project resources across various technical disciplines, fostering collaboration and accountability to deliver successful outcomes.
- **Ensure Operational Sustainability:** Develop documentation, including the low-level design and standard operating procedures, and the support structure. Support the seamless handover of solutions and sustainment to operational teams.
- **Enhance Frameworks:** Contribute to the improvement of architectural approaches and establish repeatable frameworks for designing and delivering IT solutions.

INTEGRITY • SERVICE • TEAMWORK • INNOVATION • COMMUNITY

Help us build a world-class city. We are hiring talented innovators seeking meaningful work to drive our city - and their careers - forward.

QUALIFICATIONS

- At a minimum you will have completed a 2-year diploma in information systems plus a minimum of 6 years in an IT implementation role or an acceptable equivalent combination of education and experience.
- Experience in IT implementation roles, with a proven ability to deliver large and complex solutions.
- Comprehensive knowledge of computers, programming or scripting, applications, databases, networking, cloud-hosted solutions, integrations, and IT support environments.
- Strong leadership abilities with experience guiding technical teams and fostering collaboration.
- Exceptional communication skills, both written and verbal, with the ability to convey complex technical concepts to diverse audiences.
- Demonstrated success in managing multiple projects with competing priorities and ensuring high-quality results.
- Commitment to service excellence, with a proactive approach to meeting the needs of internal and external stakeholders.
