

Do you have a passion for data and GIS?

We are looking for an individual with strong technical skills and a passion for data and GIS to join the Data Service and Analytics team as a Mapping Technician. If you believe in working collaboratively in an agile environment that embraces new technology to support data-driven decision making, this is a great opportunity for you to join our exciting and fast-paced team.

As an important part of our team of data specialists, you will be responsible for maintaining and updating the datasets in our corporate spatial database and performing on-going data quality control. You will process data requests and provide technical advice to staff and external consultants while analyzing data and creating maps, drawings, plans, graphs, charts and other presentation products. You will also oversee the intake of as-built drawings and subdivisions into the GIS and operate and maintain GIS equipment such as large format printers and plotters.

Qualifications

The ideal candidate will have a GIS or Drafting Diploma, a high level of computer expertise and experience using GIS technology. This position requires a strong understanding of ESRI ArcGIS products and relational database design along with the ability to interpret survey data to create/update civil drawings. Experience with SQL programming, python scripting, and familiarity with AutoCAD Civil 3D will provide a competitive advantage. We are looking for an imaginative, proactive addition to our team, an individual who has strong communication skills, pays close attention to detail, and has a commitment to keeping current with new technologies and skill sets.

Help create Kelowna as a *City of the Future*. Our diverse and dynamic team strives to innovate to make things better, work as one team, serve proudly and lead responsibly. Live, work and play in one of Canada's fastest growing cities. Kelowna boasts miles of lake access, public areas and outdoor recreation opportunities, a vibrant downtown and cultural scene, healthy and connected neighbourhoods. With modern technology and an ever-changing virtual landscape, we may be willing to consider applicants who are wanting to work from home, provided you reside in the Okanagan region, with the ability to come into the office, as required.
