want to be

**Position Title:** \*Project Engineer

**Position Status:** Full-Time Regular

**Department:** Water Services

**Employee Group:** Exempt

**Location:** 4515 Central Boulevard, Burnaby

**Salary Range/ Wage Rate:** Professional / Technical, Level P2A (\$108,607.20 - \$127,710.87 annually) (2024 wage rates)

Our Water Services Department is seeking a \*Project Engineer in the Asset Management and Business Support team. This position plays a key role in advancing the region's long-term reliability and resilience. The role leads and supports infrastructure planning, asset condition assessment, and risk-based decision-making for critical water supply assets, working closely with operations, engineering, and capital project teams. The Project Engineer helps develop and refine asset strategies, analyzes system performance and lifecycle risks, and contributes to capital planning through data-driven recommendations. This position is ideal for someone who enjoys solving complex technical problems, collaborating across disciplines, and shaping how Metro Vancouver manages its water infrastructure for future generations.

You are a driven individual that gets along with team members, has a sound knowledge of asset management principles, and has the knack to bring forward unique ideas to make the Asset Management function efficient. You are motivated and a self-starting individual with strong technical knowledge of Asset Management and possess excellent communication skills.

The \*Project Engineer reports to the Program Manager, Asset Management & Business Support.

**This role:**

- As a core team member of the Asset Management and Business Support group, this position performs a range of engineering and project management work including design; document preparation; specifications; contract administration; budgetary oversight; cost estimates; scheduling; report writing; implement continuous improvement initiatives, and various asset management activities.
- Prepares and tracks financial aspects of projects and provides project management oversight for multiple projects including contract administration. Sets and monitors project schedules. Monitors and controls costs within own work ensuring the effective and efficient expenditure of allocated funds making recommendations to senior engineers.

- Works on routine engineering projects and substantial components of complex engineering initiatives. Works to defined scope, schedule and budget and consults senior staff on deviations. May lead projects with well-defined outcomes and acts as a resource to junior engineers and technical staff on routine operational issues.
- Handles problems of some complexity requiring inspection and liaison with contractors and other staff to investigate related operating, construction, and design issues in order to ascertain alternatives. Assesses, evaluates and incorporates technical requirements including input from external agencies and other Metro Vancouver departments. Explains difficult issues and works to establish consensus and compliance.
- Works with engineering staff and consultants and liaises with internal departments and external contacts including member municipalities, regulatory agencies and the general public; works on multiple simultaneous projects in various stages of completion.
- Researches, analyzes, interprets, and studies technical information. Makes conclusions and diagnoses problems based on a sound understanding and application of engineering principles. Ensures quality standards are upheld in field of specialization and establishes project plans based on priorities of the unit or team.
- Identifies non-standard conditions and makes recommendations for remedy. Uses judgment to adapt and apply procedures to address and resolve unusual or problem situations. Consults on difficult, complex or highly unusual matters or decisions and provides progress and technical updates to senior staff.
- In addition, this role performs a variety of specific Asset Management duties including, but not limited to: Asset Performance management, investment management, information and hierarchy implementation, data integration & analysis, data visualization, etc.
- Performs other related duties as required.

**To be successful, you have:**

- Bachelor of Applied Science degree in a relevant engineering discipline. Necessary work experience to obtain Professional Engineering designation.
- Membership or eligibility for immediate membership as a registered Professional Engineer (P.Eng.) with Engineers and Geoscientists of British Columbia (EGBC).
- Sound technical knowledge and understanding of engineering principles and their application in relevant discipline.
- Ability to interpret and apply standard engineering and related guidelines to area of specialty such as technical manuals, codes and regulations, contracting policies, safety regulations and corporate and board policies.
- Demonstrated contract administration and project management skills. Ability to organize and prioritize a complex series of project components to meet multiple time-based deliverables requiring a high level of detail and accuracy. Demonstrates persistence in overcoming obstacles and an ability to provide updates to assist the Program Manager in making informed decisions.
- Sound written and oral communication skills; ability to communicate effectively both verbally and in writing including letter, report writing, and presentation skills. Ability to explain difficult issues and work to establish consensus and compliance.
- Strong interpersonal skills and ability to build and maintain effective and respectful working relationships with internal and external contacts. Skill in dealing tactfully and sensitively in a variety of situations including contact with the public, member municipalities, government agencies and contractors.

- Ability to work under general direction and use sound independent judgment in adapting and applying procedures to address and resolve unusual or problem situations. Uses judgment to determine which methods are applicable in any given situation. Sound problem solving skills; ability to analyze business needs and provide strategic input.
- Demonstrated ability to work in a team-oriented work environment; contributes to the team with constructive ideas, information and experiences. Demonstrated experience coordinating across departmental disciplines (e.g. Operations, Engineering, Construction, Finance, and IT teams) would be considered an asset.
- Strong analytical and research skills and ability to present recommendations clearly. Displays a high degree of integrity and professionalism with an ability to identify and implement process improvements to enhance efficiency in Asset Management activities.
- Proficiency using Microsoft office programs, including Word, Excel, PowerPoint, Outlook, and Project. Knowledge in running SQL queries is considered an asset.
- Valid B.C. Class 5 Driver's license.

***\*Candidates with greater or lesser experience may be considered at the Senior Project Engineer or Assistant Project Engineer level, respectively, along with the applicable rate of pay.***

#### **Our Vision:**

Metro Vancouver embraces collaboration and innovation in providing sustainable regional services that contribute to a livable and resilient region and a healthy natural environment for current and future generations.

Metro Vancouver employees proudly serve the region and demonstrate the behaviours and attributes of six leadership competencies: Accountability, Adaptability, Building and Nurturing Relationships, Communication, Continuous Learning, and Strategic Thinking and Action.

At Metro Vancouver, we are committed to cultivating a diverse, safe, equitable, and inclusive work environment for all. We strive to attract and retain a talented, diverse workforce that is reflective of the region we serve.
