ENGINEERING, UTILITIES, AND COMMUNITY SERVICES TECHNOLOGIST

(FULL-TIME)

Competition #2026-44

November 17, 2026

The Fraser Valley Regional District is a local government that delivers over 100 services to residents living in our eight electoral areas and six-member municipalities. We are the third most populous regional district in BC, stretching from Mission to Boston Bar. The Fraser Valley offers a great place to work and live with a mix of rural and urban lifestyles along with an abundance of recreational and cultural opportunities.

People are at the center of everything we do, and we strive to put the needs of those we serve and the employees in the organization at the forefront of our day-to-day work. We are an organization that values teamwork and respect. We are committed to diversity, equity, inclusion, and being representative of the region we serve. We invite all qualified candidates to apply. We are dedicated to the ongoing process of building relationships and examining our work to ensure that the principles of inclusion, collaboration, and reconciliation are included. If you have a passion for public service and want to make a difference in the lives of those who live, work, and learn in the Fraser Valley, consider coming to work with us.

We have an exciting opportunity for a highly motivated, independent individual to fill the full-time position of Engineering, Utilities, and Community Services Technologist. Under the direction of the Deputy Director of Engineering, the successful candidate will be responsible for the coordination of service and project delivery in the Electoral Areas of the Fraser Valley Regional District with an emphasis in the areas of water and sewer systems, drainage and flood protection works, solid waste and recyclables collection services, solid waste transfer stations and landfills.

This position offers a mix of office and field-based work. With a wide variety of daily tasks that can include everything from reviewing engineering design drawings for new subdivisions; inspecting the installation of civil works; conducting water audits; collaborating with stakeholders to develop new recycling initiatives at FVRD transfer stations; coordinating sediment removal, flood protection and other construction projects; issuance of RFPs for the selection of contractors and consultants; writing progress reports for multi-million dollar capital projects, and so much more. This position may also perform Utility Technician I auxillary coverage, which includes performing general operations and maintenance of water and sewer systems. Additionally, it may also provide support in the Emergency Operations Centre when activated.

Required Knowledge, Skills and Abilities:

- A diploma or degree in Environmental Sciences, Environmental Engineering or Civil Engineering with a good understanding of and experience working with utilities (drainage, water supply and distribution, sewage collection, and disposal), solid waste management, flood protection, and is eligible registration as a ASCT or equivalent combination of education and experience;
- Experience in local government service delivery. Knowledge of legislation, policies and procedures pertaining to Regional Districts would be an asset;
- Knowledge of principles and practices relating solid waste management and the operation of transfer stations and landfills;
- Experience in public promotion, managing projects, conducting research and feasibility studies is required;
- Strong communication and interpersonal skills, including the ability to express thoughts and ideas clearly, and converse with a wide range of people including technical consultants, elected officials, staff and the general public to provide advice, make recommendations and make effective presentations;
- Excellent writing skills, with the ability to write in a clear and concise manner, and to prepare well-written technical and administrative reports;
- Ability to establish and maintain positive and effective working relationships with consultants, contractors, stakeholders, senior staff, co-workers, team-members, elected officials, advisory bodies and the public;
- Able to obtain Small Water Systems Certification from the British Columbia Environmental Operators Certificate Program;
- Able to complete a WCB Level 1 First Aid course and certified WHIMIS Course; and
- Must possess a valid Driver's Licence.

The job rate for this union position is $48.82 per hour, plus a competitive and comprehensive health, dental, and vision package and Municipal Pension Plan. Grow your career in an organization that supports employee work-life harmony including an earned-days-off program. Take advantage of employee programs that include support for mental well-being and physical health through our onsite gym. We offer a supportive, team-based work environment with an emphasis on collaboration. We believe in lifelong learning and are committed to providing and supporting training and professional development opportunities for our staff.

If this opportunity excites you, and you want to contribute to a positive work environment, we want to hear from you. Please submit your resume along with a cover letter indicating how you meet the qualifications. Visit **www.fvrd.ca/careers** to apply for this competition by 4:30 p.m. on December 8, 2026.

While we appreciate the interest of all applicants, only those candidates under consideration will be contacted.
